

The Leader in Perimeter Protection Solutions

GEOQUIP

WORLDWIDE

Welcome to Geoquip

The world leader in perimeter protection solutions. I have been involved in the electronic security industry for over 15 years, starting as an Electrical Engineer with the M.O.D before taking up a career in sales with Group 4, Chubb, and for the past ten years, Geoquip worldwide.

M. Scott

M. Scott -
Managing Director

Geoquip was established in 1982 with the objective of bringing more professionalism to the whole industry of perimeter fence protection. Moreover, we set out an ambitious mission for our company from day one: to be a global leader in the industry.

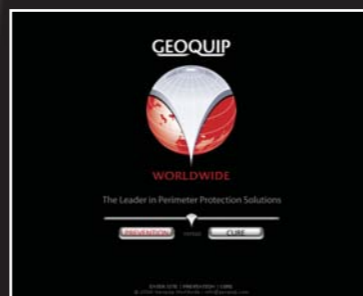

Acquiring a reputation for high quality and innovation with the successful launch of our Guardwire product. 25 years later, Geoquip products have grown in breadth and sophistication and are now supplied to over 50 countries worldwide.

Today, Geoquip are recognised as world leaders in the design, development and manufacture of electronic perimeter intrusion detection systems. Over the last 25 years, our products have been at the forefront of perimeter security worldwide.

Our mission is to transfer the past 25 years of expertise into the 'Geoquip Experience' of the future that delivers Total customer confidence, satisfaction and perimeter prevention and protection solutions worldwide.

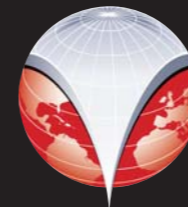

The first step to reflect our image for the future was to re-design our original 'Black and Red' logo whilst keeping the Geoquip name. This new worldwide logo was launched on all of our print pieces, website and exhibition stands throughout 2006.

This striking new logo represents the pride, passion and professionalism we all have in Geoquip.

GEOQUIP

WORLDWIDE

Protecting everything from Her Majesty's Prisons, International Borders and Airports to Her Majesty's Crown Jewels.

You have now taken your first and most important step towards crime prevention. Most customers believe security is CCTV! Whilst CCTV can be an integral part of a security solution, Geoquip's Perimeter Protection Solutions give you that all important early warning. Detection, Prevention and Confidence.

In addition to supplying equipment for major international security projects, Geoquip has gained considerable experience in developing effective security systems for defence establishments, prisons and secure mental hospitals, ports, government institutions, retail and distribution depots, oil, gas and nuclear installations, airports, cross country border posts as well as numerous blue chip companies.

On a highly confidential basis, Geoquip products also protect the rich and famous in their VIP residences all over the world.

Our successful global expansion has been helped enormously by introducing a variety of new and technically advanced Geoquip products. The first of these was Rafid, which provides covert protection for perimeter walls and open ground. Tried and tested exhaustively by the Home Office and used by the military and governments around the world, Rafid is now equally sought after by international companies and high profile VIPs.

In 2005, Geoquip launched GeoLog and GTherNet in response to a prestigious project specification for international border control, which is increasingly demanded in Europe. The unique configuration of these products provides a significant cost saving on particularly large projects and further enhances Geoquip's reputation as the leader in perimeter protection solutions.

Geoquip would like to congratulate the BSIA on their 40th Anniversary

Proud - Passionate - Professional

PREVENTION VERSUS CURE
